PROFILE

I aim to obtain a position that would allow me to use my electrical engineering knowledge and studies to work in the industry and design and optimize power circuits. My basic interest is working in the power station and industry to experience and understand the control systems and practical work with electronic devices. I'm a very determined and dedicated person to my every word. I work with zeal and intense concentration and try to give my 100% in every field. Leadership skills are quite distinct in me; I can work either efficiently independently or in a team. Moreover, I'm also worked in "DACs" Society as a photographer.
