  B tech
  7.0

SKILLS

- Python AI & ML Computer networks and network security Web development Data analytics DBMS MS office Business tools Communication Team management Leadership skills Teaching skills Photoshop Business management Product management

PROJECTS

- **Hospital management system**
  Project Description: Hospital Management System

  The Hospital Management System (HMS) is a comprehensive software solution designed to streamline and automate the administrative and clinical operations of a hospital. The project aims to enhance efficiency, improve patient care, and ensure the seamless management of hospital resources.
- **Plant disease detection**
  This project is based upon AI&ML
  The Plant Disease Detection system is an innovative project designed to identify and diagnose diseases in plants using advanced image processing and machine learning techniques. The primary objective of this project is to aid farmers and agronomists in early disease detection, ensuring timely intervention and mitigating crop losses.
