Summary

As a senior front-end developer with +6 years of experience, Experienced in different industries (Fin-Tech, E-commerce, Real state, Booking, Social, Personal Identities, ERP Systems, and Government projects), I am passionate about solving complex problems in simple and elegant ways that provide the best way to provide excellent solutions.

Work Experience

Hawsabah - Software House (Saudi Arabia),   October 2023 – present | Sheikh Zayed, Egypt
Senior Front-end Engineer

- **In (HOLLAT) team of two front-end developers, my responsibility is to** deliver many modules in the appointment client and admin portals, fix many bugs, improve the delivery cycle for the team overall, and Provide many creative solutions, using angular 16 and angular material.

- **In (KKESH) team of three front-end developers, my responsibility is to**
  Creating a client portal from scratch with an amazing team that made everything in the project work dynamically from every single component using angular 16, primeNG, and creating many reusable components from scratch to fit the client's need and match the business requirements and match the design to be pixel perfect.

MVP-Solutions - Software House (England, Egypt Branch),   October 2021 – September 2023
Senior Front-end Engineer   nasr city, Egypt

- **In (SHOOP) team, my responsibility is to** fix bugs and add new modules, this web application for events helps users add events for free or for money and other users can apply to the events to attend to it and it's built by angular.

- **In (V-Pay, KYB, KYC) team, my responsibility is to**
  Creating web application for fintech services and it's built by atomic design and has its own inventory as UI library based on NPM packages and design system and creating storybooks and it's built by react js.
