Senior Backend Developer

"Former game developer turned backend specialist with 7 years' experience. Mastered Node.js and Python to build scalable, dynamic systems."

WORK EXPERIENCE

Vee Tech

Veetech (https://veetech.uk/) is a UK and Egypt-based technology partner driving digital transformation through agile software development, IT consulting, and system integration, delivering secure and scalable solutions.

Technical Lead   **01/2023 - Present**

- Fostered a collaborative team environment that improved project delivery timelines, leveraging strong leadership and communication skills to align team efforts with business goals.

Full stack developer   **01/2022 - 12/2022**

- Full-stack developer who evolved from a Node.js and Python Flask backend specialist to a versatile contributor on engaging front-end experiences—crafting seamless, robust solutions across the tech stack.

Back-end developer   **11/2018 - 08/2021**

- Skilled backend developer with expertise in Node.js, Python Flask, and Socket.IO. Built scalable, efficient systems and real-time applications for diverse platforms.

Junior 2D game developer   **11/2017 - 11/2018**

Designed and developed engaging mini-games for mobile platforms using the Unity game engine and C#. Built and implemented robust backend servers with Node.js and Socket.IO to enable seamless multiplayer experiences.
