OBJECTIVE

To cultivate an enriched career in the construction field by updating the currently developing technologies and looking for challenging jobs that could provide me with an opportunity to expose my technical skills and my objectives.

WORK EXPERIENCE :

- 1) Worked with SBJV I/S-ITINERA -S.p.A as a QC Engineer April 2022 to July, 2024
Vordingborg -Denmark

About the project: The Danish Road Directorate is building a new Storstrøm Bridge, which will connect Zealand with Falster via Masnedø. The bridge will be approximately 4 km in length and it will be Denmark's third longest bridge, only exceeded by the Øresund Bridge and the Storebælt Bridge.

Roles and responsibilities:

- Pre-pour, post-pour and pre-delivery Inspection of Pre-cast Element as per approved shop drawings.
- Inspect the formwork panel & and make sure that the forms panel is properly clean/clear & and that the release agent is applied.

- Inspect & ensure the element's dimensions and all the embedded items comply as per production drawing.
- Supervise and check before and after the erection/installation of Pre-Cast elements at the site to meet the ever-changing requirements of qualifying factors of clients.
- Prepare Pre-pour and post-pour Inspection Reports, daily inspection Reports, and Daily Delivery Monitoring Reports & also update in the database common sharing folder.
- Raise NCR report with Pictures taken at the spot/site in case of any Non-Conformance.

2) - Worked with Saliniimpregilo LLC. Dubai Branch from 2017 to May 2019

as Quality Control Inspector at Meydan One Mall.

About the project:

Client: Meydan
