PROJECTS

23/04/2022 – 03/05/2023

● Stock Management System

Inventory Management System–Umarzai Building Material

Developed a custom Inventory Management System in C# with MySQL database integration to streamline stock control, sales tracking, and purchase management for Umarzai Building Material. The software featured real-time inventory updates, automated low-stock alerts, and detailed reporting capabilities, improving operational accuracy and reducing manual workload. Designed with a user-friendly interface to ensure ease of use for non-technical staff, enhancing efficiency and decision-making processes.
