

Dear Sir/Madam,

I am writing to apply for the position of Electrical Engineer. I hold a Bachelor's degree in Electrical Engineering (Power and Control) from Al-Zaytoonah University of Jordan, in addition to a Diploma in Energy Engineering.

I have practical experience in electrical maintenance, project execution, and site supervision through my previous role as Maintenance and Projects Engineer at Defense Technology for Protection Systems, the agent of Rapiscan in Jordan. I am currently working as a Maintenance Engineer at Integrated Power System. I also gained valuable field experience through my training at the Ministry of Public Works and Housing in the Electromechanical and Electrical Department, as well as at Greater Madaba Municipality, which enhanced my knowledge in electrical works supervision, maintenance, drawings interpretation, and site coordination.

I am seeking to join a professional organization where I can further develop my engineering skills and contribute to achieving its objectives through commitment, responsibility, teamwork, and full readiness for fieldwork and relocation as required.

Please find my CV attached for your review. I look forward to the opportunity to discuss my qualifications and experience further.

Sincerely,
Eng. Hammam Nawaf Saleh Abu Naseer
