PROFESSIONAL SUMMARY

A Lathe Machinist is a skilled tradesperson who uses a lathe machine to shape and cut materials into desired shapes. This could include metal, or other materials, depending on the application. The machinist will use a variety of tools to shape, cut and finish the materials, including drills, reamers, taps, end mills and lathe tools. The machinist will also use various measuring instruments such as calipers, micrometers and dial indicators to ensure accuracy and quality.
