EDUCATION

Software architecture engineering | [ESPRIT School of Engineering](#)

September 2021 – October 2024

Applied Bachelor in Information Systems Development | [ISET de Kelibia](#)

September 2018 – July 2021

Baccalaureate | [Lycée Elmghira](#)

2018

ACADEMIC EXPERIENCE

SpringBoot Angular project "Intermove" | [ESPRIT](#)

January 2023 – May 2023

Project description : A platform that helps students find an opportunity to study abroad

- Developing the backend of accomodation module.
- Ergonomic and easy to use front end development using **Angular**.
- Using the Rest API.

Technologies: Jira MySQL SpringBoot Angular Git Figma

Multiplatform project "Victorious" | [ESPRIT](#)

January 2022 – May 2022

Project description : Victorious is a platform that helps tournament organizers manage their events, easily connecting them with players.

- Development of advertising and news modules.
- Manage desktop, web and mobile application development using **Java & Symfony & CodeNameOne**.

Technologies: Java CodeNameOne Symfony MySQL Git

PROFESSIONAL EXPERIENCE

FullStack Developer | [Freelance](#)

August 2024 – Present

Description: Building scalable web solutions for projects using modern full-stack technologies.

- Developed and maintained applications with **Spring Boot (Java)** and **React**, ensuring performance and clean architecture.
- Automated deployments using **Docker** and **GitLab CI/CD**, reducing manual work-flows.
- Deployed cloud-based services on **Azure**, with monitoring for scalability.
- Collaborated in **Agile** environments with version control (**Git**).

Technologies: Java Spring Boot React Angular MongoDB MySQL
Docker GitLab CI/CD Azure

End of studies project | [WAYOUT](#)

May 2024 - September 2024

Project: Development of the ZigoFiltre web platform

- Developed an eco-friendly web application.
- Implemented interactive dashboards.

Technologies: MongoDB SpringBoot Angular Azure Figma

Engineer internship | [NEXITS](#)

June 2023 - August 2023

Position: Trainee in the development department

- Discovering, cleaning up code and fixing bugs.
- Development of complex APIs using **Express.js & MongoDB** and implementing frontend interfaces using **Vue.js**.

Technologies: MongoDB Express.js Vue.js
Node.js Cloudinary Figma Jira Google Workspac

End of studies project | [Sagemcom](#)

January 2021 - June 2021

Project : Development of a traceability management platform

- Development and manageability of the application structure.
- Backend development using **.NET**
- Front-end development using **Angular**

Technologies: .NET Angular MySQL

Integrat

January 2020 - February 2020

Project : Develop a management application of incidents

- Application structure design.
- Easy user interface development using **WinForms** and **C#**

Technologies: WinForms C# MySQL

Initiation internship | [PrintSecure](#)

January 2019 - February 2019

- Discover the network service.
- Learn how to integrate into a team in a professional environment.

LANGUAGE SKILLS

Arabic	Native
English	Fluent
French	Advanced

TECHNICAL SKILLS

- Programming Languages:** Python, Java, Javascript, TypeScript, C#, C, PL/SQL.
- Technologies/Frameworks:** React, React Native, Vue.js, Express.js, Angular, .NET Core, Spring Boot, Symfony.
- Databases:** Microsoft SQL Server, MySQL, MongoDB.
- Developer Tools:** GitHub, VS Code, Visual Studio, Intel-ii, Spring Tool Suite,Android studio.
- DevOps:** Docker, SonarQube, Prometheus, Grafana, Nexus, Azure, Gitlab.
