

Mariam Elnahass

front-end developer

Front-end Developer skilled in **HTML, CSS, JavaScript, and Angular**. Focused on transforming creative designs into functional, responsive web applications with a keen eye for detail and performance.

Technical Projects

Range Rover Showcase Page

- Designed a high-end, professional landing page featuring Video Backgrounds and a modern Bento Grid layout.
- Utilized advanced CSS techniques and Bootstrap to create an elegant, luxury-brand user experience.

Sigma Perfumes Landing Page

- Built a minimalist, elegant e-commerce interface for a luxury perfume brand.
- Applied custom CSS hover effects and responsive design to ensure a seamless experience across all devices.

Sweet Shop Website

- Created a visually appealing multi-page website for a confectionery business.
- Focused on UI/UX best practices to showcase products effectively using HTML and CSS.

E-commerce Product Page

- Developed an interactive product page using Vanilla JavaScript to handle dynamic shopping actions.
- Implemented functional features such as "Add to Cart," price calculations, and real-time UI updates.
